HISTORY

On behalf of the entire team of Al Amin Salt, We would like to express our sincere admiration and gratitude for the amazing efforts to our "Co-Founder" to continue this legacy. We pride in your hard work and dedication to making "Al Amin" a name of Success and Trust.

MR. SHEIKH MUHAMMAD AMIN (LATE)

Founder Al Amin Salt

Mr. Sheikh Muhammad Amin (late) was the pioneer of Al Amin Salt. By the grace of Almighty Allah, he brought his passion to life through a wide range of business that are designed with future generations in mind. Words cannot express the gratitude for his hard work and efforts which sustain the business and make Al Amin Salt one of the leading company of salt. We pray that our spirits remain always enlightened with his superior light of humanity, hard work, consistency towards achievements and moral value.

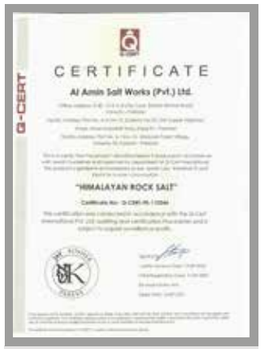
SHEIKH AL AMIN (LATE)

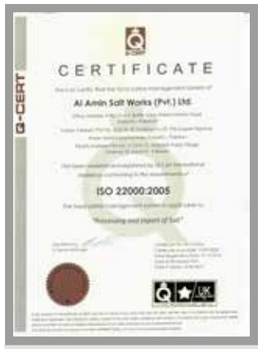
Mr. Sheikh Al Amin Sb (late), beloved son of Mr. Sheikh Muhammad Amin, is the pride of Al Amin Salt, known for his tremendous grip over business relationships, commitments, business management , principals and played a major role in the development and growth of the company . He had given his efforts and abilities for the betterment and inclination. His vision, efforts, loyalty and sincerity towards the progress of Al Amin Salt have remained a journey for hard works for all involved in the concerns of our Company. The light he showed gave us inspiration experience and knowledge.

The same legacy is continued by closed cooperation of their decedents which has introduced new ideas and methodologies to run the business smoother, and to evolve it to the heights of achievements.

OUR CERTIFICATIONS

Our certificates express our accomplishment. Al Amin Salt Works (Pvt.) Ltd. never compromises on the premium quality of Salt. We have the apparition to let our valuable customers relish our organic and inorganic products. As we grab many certificates it speaks of our reliability, reputation, integrity, honorableness and righteousness. We acknowledged these certificates as a consequence of our advanced quality, which sustains that we have an accurate and defined system with applicable premium principles. These certificates are recognized globally because we certify best quality of the products. Being the international exporters we target to deliver the standard and leading quality Salt Products.





EXECUTIVE MEMBER OF SALT MANUFACTURING ASSOCIATES OF PAKISTAN (SMAP)

Al Amin Salt Works (Pvt.) Ltd. Associates with Salt Manufacturing Associates of Pakistan SMAP which represents all Salt Manufacturers, producers & exporters in Pakistan. This industry has the potential to become one of the Pakistan's fastest growing & most valuable export-oriented Industries.

Al Amin Salt Works become a member of SMAP, came into existence on 01st April 2021 by commencing interactions with the Ministry of Commerce (Moc) and Trade Development Authority of Pakistan (TDAP), Ministry of Food & Agriculture and also with the Planning Division of the Government of Pakistan to play a pivotal role in safeguarding the business interest of Salt Industry.

Al Amin Salt Works (Pvt.) Ltd. is now a part of SMAP in order to highlight its potentials and contributions to the nation's economic prosperity.

BUSINESS OVERVIEW

Our High-tech plants with advance technology are made by our own trained staff and German experts. Al Amin Salt Pvt Ltd was established with a team of a handful employees; and now, it has grown into the largest manufacturer, processor and exporter of multiple grades and categories of Salt Products of Pakistan.

With the modern technology we are proficient to produce 99.9% pure salt. We are not only producing pure salt but also have a control to reduce impurities up to ppb level. Al Amin Salt Works (Pvt.) Ltd is truly passionate about salt. From the sources of salt and harvesting practices to packaging and delivery, we work untiringly to innovate procedures and pioneer technologies to improve the salt while preserving the artisanal craftsmanship and unique characteristics of each grain.

We produce a full range of ingredient salt ideal for any application, expertly crafted to meet our large volume processing and production of salt.

Currently, we have a work force of 200 professional employees, specialized in Salt Production. Our company, currently own multiple units based in Karachi and other regions of Tharparker (Sindh).

FOOD SAFETY POLICY

Al Amin Salt is committed to providing its customers with salt products that are readily bestowing to food and nutrient safety and hygiene principles using state of the art technology. This endorses food safety consciousness and strictly conforms to good manufacturing practices

Al Amin Salt Works Pvt Ltd, not only retain ourselves well-informed with in-house constant training sessions to study what is innovative in the industry, but existence leader in the field of salt processing are designed, generated and continuously monitored at Al Amin Salt for others to follow.

Our safety management system combines the disciplines of quality, safety and risk management with real-time performance to ensure, can demonstrate a completely proactive and anticipative approach to operational activities.

We deal in systematic approach to monitor food safety hazards in order to ensure food i.e. salt is safe to consume in either edible grade, industrial grade ,pharmaceutical grade, oral care, skin care and hair care or any proceed in any sensitive grade .

RESOURCES

SOLAR SALT

SEA SALT

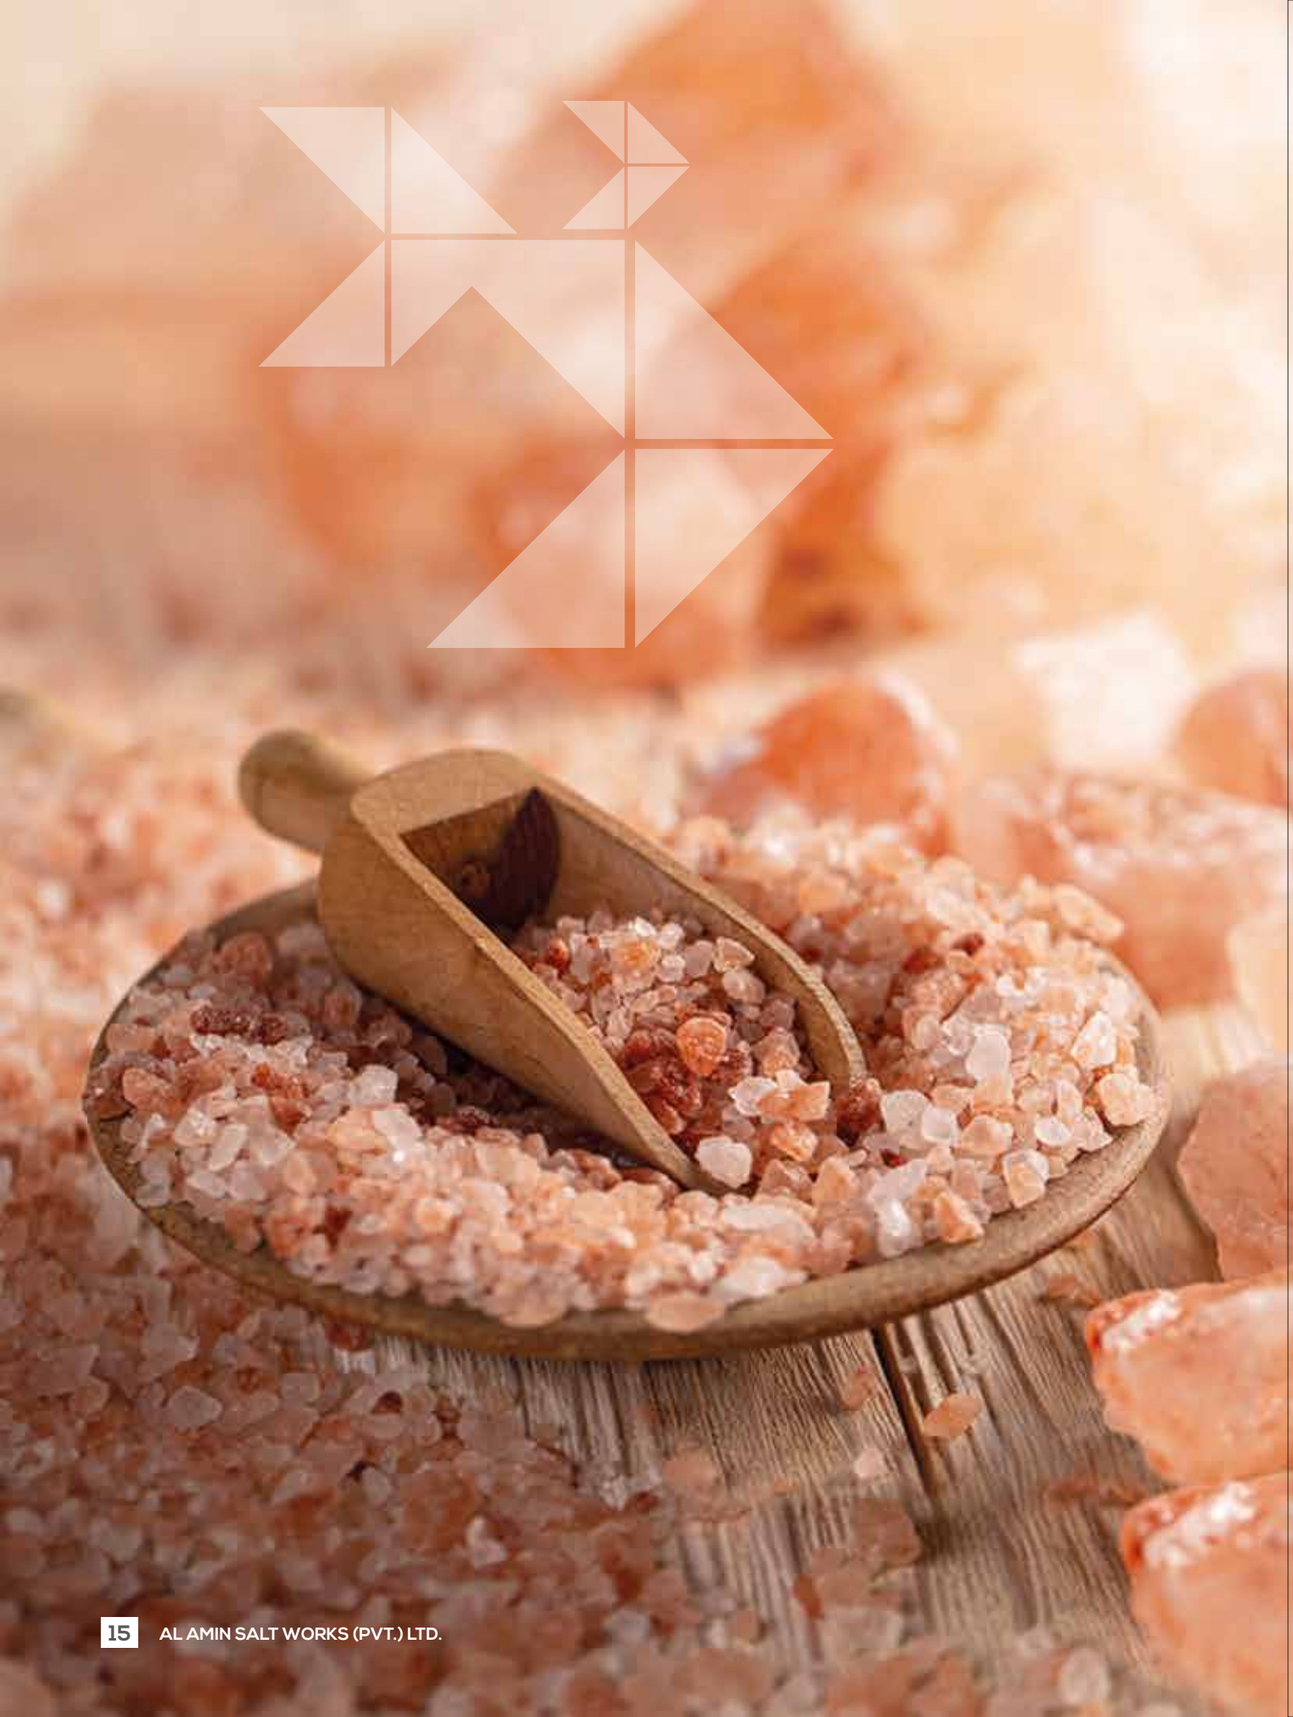
We are also producing high quality Sea Salt in our 800 acres salt facility 70 km away from Karachi city, where we are inducing pollution free sea water to yield best quality sea salt. The area is known as Dhabeji.. Our sea salt purity is about 96 – 98% in raw form. Al Amin Sea salt facility is the latest industrialized facility of Pakistan and due to managing on modern scientific principles we are producing best quality sea salt in the region.

Quality in reference to sea salt does not allude to the chemical transformation of the product. It stands in reference to the refining of the product, by washing the sea salt with pure water, drying, breaking and sieving the salt grains. Finally at Al Amin Salt, every single grain goes through an optical washing machine that rids the salt from any natural impurities. The intense calibration and de-dusting of the fine fractions ensure optimum flow of the product.

LAKE SALT

In Pakistan, Lake Salt is attainable in exceptional quality and sufficient quantities. It is challenging for manufacturers to extract the salt from the lakes due to the difficult routes to the lakes but now with the advancements and development of the infrastructure in Pakistan, the extraction has become easier.

We are having the capacity of more than 10,000 acres of solar salt. This facility is consist of 10,000 acres salt lakes which is situated in the Tharparker Sindh, where we are harvesting best quality salt from 25 different salt lakes. Our salt harvesting capacity is about 5000 tons per day. Al Amin Salt has also established control salt crystallization facility in one of our lake. This state of the art facility is producing very high purity salt, which is directly suitable for food as well as for industrial applications. All salt lakes are well connecting with carpeted road, especially design to handle the cargo of bulk vessels.



ROCK SALT

Al Amin Salt Works Pvt. Ltd. has partnership in many rock salt mines situated in 400 km long Khewra salt belt, where we are mining white, pink to dark pink Himalayan Rock Salt for food as well as fancy items for decoration purpose. Our Himalayan Pink and Dark Pink Rock Salt is world famous due to its natural beauty, natural processing and it contains completely natural mineral compounds that consist on, not only sodium chloride but essentially up to 84 minerals trace elements in the equivalent proportions that are originate in human blood. Such salt remained associate with healthful and life enhancing effects. Treasured for its clean, upfront salt taste and its extraordinary color, all-natural Himalayan Pink Salt has become an imperative ingredient in kitchens worldwide. The varying shades of delicate pink to dark rose are the lasting result of trace minerals such as iron, magnesium, potassium and calcium. Available in an extensive selection of grain sizes, this versatile mineral salt is the attractive essential that your kitchen needs. Buy in bulk to replace your everyday table salt with delicious Himalayan Pink Salt.

We are also manufacturing a wide variety of rock salt products, Our Salt lamp production unit is successfully producing not only natural lamp but the crafted shapes like animal, famous places, Christmas tree etc. We provide best quality Natural salt lamps, T-Light holders with most appealing designs and innovative ideas along with accessories and customized packaging as per requirement. We are also producing bath salt, bath soap, cattle lick, cooking plate and spa salt therapy products. Al Amin salt has produced and offers complete construction solution of salt room for Salt therapy also known as Halo therapy that is 100% natural, drug free, powerful treatment in a controlled air medium that simulates the natural salt cave microclimate to treat respiratory and skin conditions.

BLACK SALT

Al Amin Salt's provides extensive variety of edible salts also comprises black salt which is correspondingly sometimes referred as Himalayan Black salt. Black salt has antioxidant properties and has surprisingly low sodium levels. It also contains important minerals like iron, calcium, and magnesium, which are essential to healthy bodies.

Black salt is commonly used in cooking and is a popular ingredient in traditional recipes. Black salt or Kala Namak is known for its sulphurous smell and it has a very different taste. It is frequently used as seasoning salt for fruits, juices and salads as it adds a very unique savory flavor in snacks. Black Salt is made by using Pink Himalayan Salt which is melted in a furnace by giving a very high temperature together with a unique blend of natural herbs. The salt then darkens in color and develops a distinctive taste and smell.

We have developed a special recipe for the black salt which enriches the flavor and color that the black salt is known for. Other than its unique flavor, another reason for black salt gaining popularity is Asia is its health benefits. Black salt is known to have a cooling effect on the body and also helps the digestive system. Black salt was mainly used in Ayurvedic medicine for its holistic, therapeutic properties. It is filled with minerals that are insoluble, making them harder to be absorbed by the body.

SEASONED SALT

Our Himalayan pink salt range also includes salt contrasting with spices and herbs, giving it a perfect seasoning flavors. This process includes mixing and blending of the appropriate amount of herbs and spices together with salt, when crushed giving it a perfect spiced flavored salt to be seasoned with your favorite cuisines.

The aroma and flavor when infused together with salt, completes the missing flavor in your most wanted delicacies. Moreover the salt is evenly crushed using high quality grinders, which evenly distributes the herbs and spices along with the salt giving it the final touch needed for your food.

We provide variety of flavors for our customers including Pink Salt with White Pepper, Black Pepper, Paprika, Garlic, Oregano, Basil Leaves, Lemon, Chili Flakes, Thyme, and Mixed Herbs.

We also provide customized flavored salt, as per our customers demand.

MANUFACTURING PROCESS OF WHITE SALT

Al Amin Salt Works Pvt. Ltd. is a trustworthy salt manufacturer, exporter and supplier, providing millions of tons of salt to consumers worldwide every year. In imperative to move these large volumes, we adhere to severe standards and best practices in salt manufacturing to ensure the highest quality of salt and salt products. Al Amin Salt Works Pvt. Ltd utilizes three common types of salt production – rock salt mining, evaporation, and solar – and also uses an exclusive method of evaporation production, which creates unique, grade salt with superior functionality.

Evaporated Salt Production, otherwise referred to as "Solution Mining," describes the process of evaporating moisture from a manufactured brine to form salt crystals. Freshwater is injected into an underground salt deposit where it dissolves the salt into saturated brine. This brine is then pumped back to the surface where it is boiled and evaporated to create salt crystals. This method of salt production is ideal for food-grade salt applications as it delivers high-quality, high-purity salt between 99.6% and 100% purity.

Harvesting of salt

Evaporated Salt Production

Solar Salt Production

Solar Salt Production is the process in which naturally occurring salt water (from a sea, lake, etc.), is channeled into a series of shallow, interlocking ponds. Over time, the water moves through the sequence of ponds that allow evaporation of water to create brine solutions until the most saturated brines evaporate to form salt crystals. This production method produces high-quality, high-purity salt, ranging between 99.6% and 100% purity.

PRODUCT APPLICATIONS

OUR PRODUCT APPLICATIONS

We are the oldest and leading salt processing industry in Pakistan and only one who has owned all three types of salt (Sea Salt, Lake Salt, Rock Salt) as a raw material sources. We are producing more than 500 products for food, Industrial and Pharmaceutical applications. With this state the art technology we are capable to produce 99% pure salt. We are not only producing pure salt but also have control to reduce impurities up to minimum ppb level.

EDIBLE SALT

TRIPLE REFINED FREE FLOW IODIZED SALT

Al Amin triple refine free flow salt is special refined food grade salt. We play an indispensable role in the global campaign against Iodine deficiency disorders by producing iodized salt. We are the leading Manufacturer and Exporter of Iodized salt from Pakistan. Iodized Salt is an essential part of our diet that provides several health benefits. Our range of Iodized Salt is of high quality and is available at reasonable prices.

DOUBLE REFINED SALT / TABLE SALT

We are elaborated in providing high grade Refined Salt / Table salt that is processed as per the international standards under the utmost promising conditions. The obtainable salt is known for freshness, extra nutritional value, and natural taste and is free from any kind of contamination. To ensure its premium quality, this salt is stringently tested on various parameters.

DOUBLE REFINED FORTIFIED SALT

Salt is the best carrier for micronutrient and the world enjoy this source to eliminate many deficiency disorders, including Iodine deficiency disorder (IDD). Al Amin Salt has been playing their role to eliminate IDD from Pakistan and we have become one of the major player in this field. Double Fortified salt with Fluoride and Iodine is available too. We are also manufacturing double fortified salt with Iron and Iodine and similarly in combination with folic acid too.

LOW SODIUM SALT

The Low sodium salt is also available at Al Amin Salt for the people who are hypersensitive with sodium. The Low sodium salt is a kind of medicated product. It is specialization of Al Amin Salt to produce fortified salt with Low sodium salt. Now low sodium salt is available with Iodine, Fluoride, Iron, Zinc and Folic Acid.

BLACK SALT

We are a major Supplier & Manufacturer of Black Salt from Pakistan. Black Salt offered by us, is hygienically processed and is highly acclaimed for its purity and taste. We provide Black Salt in proper packaging in order to retain its taste and keep it free from moisture. Black Salt mostly used in flavoring food, digestive aid, cleansing purpose and Ayurveda medicine.

INDUSTRIAL SALT

HIMALAYAN PINK SALT

MANUFACTURING PROCESS OF HIMALAYAN PINK SALT

We are pleased to express that in Al Amin Salt Works Pvt. Ltd. we have a uniquely designed plant for salt. Our production of the salt is fully automatic which guarantees a clean and standard product without any possibility of a human error. Our units are completely automated end to end State of the art. Our intact Production unit is monitored by our technical staff, each quality control centre point has specific superintendent for well monitored observation, reporting, recording and traceability purposes.

Our manufacturing process includes extracting the all-natural Himalayan salt directly from the source in Punjab, which is then transported to our manufacturing facility in Karachi. We believe in providing the purest form of salt to our customer without any possibility of human error and any other harmful minerals and additives making it safe for human consumption. This process includes the pink salt getting washed right from its raw form to its semi-finished stage. This removes several contaminations making it safe for consumption. The salt is then dried controlling its moisture level and to keep it safe from losing its texture, which is then crushed according to the required grain size needed. Subsequent the Pink salt is sorted to remove any piece of metal or impurity that would have remained intact to the salt. Then a sample from the processed batch is been inspected for quality assurance, after which the finished product is packed and loaded

Moreover all our products have an internal Lott and batch numbers to trace quality control supervisors and quality control officers on the line. Al Amin's Salt is a trusted salt manufacturer and supplier, providing millions of tons of salt to customers worldwide every year. In order to move these large volumes, we adhere to strict standards and best practices in salt manufacturing to ensure the highest quality salt products.

CHLOR - ALKALINE GRADE (ELECTROLYSIS SALT)

The purity content of our salt makes it absolutely appropriate for the electrolytic production of chlorine, caustic lye. Salt is the basic raw material for manufacturing of Caustic Soda, Sodium carbonate and sodium bicarbonate. The Chlor alkali industries are also producing Hydrogen Chloride, Sulphuric acid and especially chlorine which is further use for polymers production like, Poly Vinyl Chloride and Vinyl chloride mono. At Al Amin Salt we are producing this grade according to consumer requirement we not only meet our valuable customer specifications but also go beyond their essentials. Our salt expert team aware the quality requirement of chlor alkali and also has command on brine purification so our customers are enjoying this expertise too.

OIL DRILLING GRADE

We are producing salt for drilling mud. Its especial bulk density and particle size always helps to pour in drilled well and high density help the crude oil to come out on the surface. We also control the moisture level and hardness factor of our product that may effect on the quality as well as processing of crude oil.

OIL REFINERY GRADE

Oil refineries are also using our explicit salt that we produce by considering all required specifications including bulk density, surface of the product, particle size and particle size distribution, level of surface moisture and moisture trap inside the crystals. The product is also very pure and contains maximum purity of NaCl and free from Iron impurities too. We are aware of particles size importance as fine particles may escape and cause corrosion in the system that may damage the processing unit.

CHEMICAL GRADE

The chemical grade is consumed by industrial consumer to produce a variety of products which includes but not limited to soda ash liquid sodium, metallic sodium, chlorine, caustic soda, sodium sulphate, sodium carbonate, hydrochloric acid, sodium bicarbonate and sodium nitrate.

TEXTILE DYEING GRADE

Al Amin Salt is the market leader especially in textile dyeing grades. All available grades of textile dyeing are available with us. We manufacture all grades including zero hardness to cater the requirements of our customer. Salt plays a central role there, since it acts as the ionic force that transfers the dye onto the fabric.

DYES MANUFACTURING

Salt is sometimes used as base media of dyes and sometimes as mixing agent to dilute the concentration of dyes that helps to prepare typical colors combination. We also supply our zero hardness salt for very sensitive dyeing application especially for royal blue color. During the process of dyeing, the salt is used in the exhaustion of the dye into the fabric. Poor quality salt gives an uneven color exhaustion which looks bad on the fabric and sometime even stuff in dye bath break and form lumpy solution.

TOOTHPASTE GRADE

Toothpaste grade is also produce by Al Amin salt to protect your teeth. Salt plays a vital role by acting as germicide. We also supply fluoridate salt for oral care to the manufacturers of toothpaste.

DETERGENT GRADE

Detergent manufacturer are relishing our salt as viscosity increasing agent, the brilliant white color of our salt for detergent grade is suitable for this application. Many grades are available, specified by our customers. We are producing what exactly our customers need.

ANIMAL CASING GRADE

The animal casing grade of salt is used mainly to preserve the animal casing. These casings later are used for the manufacturing of leather and related products. There are about 6 different grades of salt supplied to the customers and specification is varied with their requirements. Our grade is applied as a preservative animal casing, throughout the world. In Pakistan, animal casing industries use this salt, along with other techniques, to safeguard animal casings.

PURE DRIED VACUUM (PDV) SALT

The PDV industrial salt is extremely pure and has a sodium chloride content of typically 99.9%. This high level of purity is achieved through an extensive crystallization process and the use of particularly pure and pristine brine. Our sophisticated crystallization process is the base for an extremely pure and white quality product, satisfying the high requirements of the industry.

PDV salt is frequently used as food-grade salt, for industrial applications and for pharmaceutical purposes. A fine white free flowing salt 99.9% made to a high specification. It is also used during water treatment, dye and soap manufacturing. It has a high chemical purity greater than 99.9% due to low sulphate, bromide and moisture levels. PDV is Halaal certified for food use also. Al Amin Salt is one of the largest supplier / exporter of PDV salt from Pakistan due to its highest purity and vast application in different Chemical, Food, Textile and Pharmaceutical industries.

ANIMAL FEED GRADE SALT

Sodium is a significant building block for both humans and animals. This is why farmers and animal feed companies always add sodium to their animal feed. Salt for animal feed, mixing salt adds flavor to the food, and as a result the animals will eat more and grow faster. Sodium also causes animals to retain more fluid and increase in weight.

SALT TABLETS/ WATER SOFTENING GRADE

Al Amin salt is also producing salt tablets for special water softener recharge. These tablets are available in commercial, food and pharmaceutical grade salt. Al Amin Salt produces 4 different grades for water softening. Salt is used to charge cation exchange resin by its sodium part. As aware of product application we always remain our insoluble and calcium sulphate part of our product to enhance the cation exchange resin life.

DE-ICING/ ICE MELTING SALT

Industrial salt is majorly used in the removal of ice and snow from roads to make way for a safer surface to drive on. Before the weather turns unfavorable, the ice is spread on roads to create a layer of brine that does not allow the formation of ice. Al Amin currently supplies this grade in 50 kg/jumbo bag to many of their customers worldwide.

HIMALAYAN SALT

Found deep within the Himalayan Mountains, comes from the Khewra Salt Mine, the second largest salt mine in the world. This salt is extracted from original sea beds that conserved long ago, before contemporary pollutants occurred, advancing to the belief that this salt is one of the purest salts on earth. The beautiful, varied pink coloring of Himalayan Pink Salt is due to the extensive variation of trace minerals contained in this salt, giving it the signature light to dark pink coloring for which it is loved. Carefully and sustainably sourced from the origin, Al Amin's Himalayan Pink Salt products are the top quality obtainable on the market. By removing any unwanted fragments, color sorting, and exactly sizing the grains to confirm easiness of usage in any application, our exclusive quality processes ensure that Ancient Ocean is naturally the cleanest, safest and Best Quality Himalayan Pink Salt available on the market. It also has slight amounts of calcium, iron, potassium and magnesium, making it slightly lower in sodium than regular table salt. Mostly prefer the flavor of Himalayan salt over other types.

EXPLORE OUR GRAIN SIZES

Al Amin's Himalayan Pink Salt is the highest grade pink mineral salt in the world. Unlike other brands, our Himalayan salt goes through several all-natural proprietary processing methods that guarantee its purity and beauty, and leave its trace minerals intact. We proudly guarantee the quality and authenticity of the salt, and offer the most comprehensive selection of consistent grain sizes available to suit a wide variety of manufacturing, processing and retail applications.

KITCHEN AND CULINARY

COOKTOP & SERVING PLATTER

Himalayan Salt Slabs, Blocks, Plates and Bricks are nature's cook top and serving platter in one, proposing many artistic culinary uses although carrying the benefits of natural, pure salt with no chemicals or additives. Heat your Himalayan pink salt slab, plate, or brick to high temperatures and sear thinly sliced fish, meats, vegetables, seafood and other quick-cooking foods. Subsequently Himalayan salt blocks are a natural product, the threshold for high temperatures and pressure may fluctuate, as the physical characteristics and inclusions which give your salt slab a one-of-a-kind appearance. Will find that Himalayan salt plates, slabs, and bricks make for a fascinating presentation of both hot and cold foods for your home, restaurant, spa or catering facility. We are having wide variety of kitchenware and culinary items like pestle and mortar, tequila shots, bowls, salt and candy jars, serving platter, cooking slabs and blocks.

TEQUILA SHOT GLASSES

These shot glasses, hand carved from 100% natural pink Himalayan rock salt, are the seamless vessel for your drink to add a hint of salty flavor. Experience the refreshing chill by sipping your drink from a salt shot glass.

Our shot glasses are made from the finest rocks handpicked by our team to ensure the glasses maintain their structural integrity. The trick to using these shot glasses correctly is to use them for drinks designed for quick gulping.

ANIMAL SALT LICKS

Animal Salt Lick is made entirely from pink Himalayan Crystal Salt. It comes with a hole drilled through the center of the block, plus a natural fiber rope to tie it to a fence post or other object. A salt lick is a deposit of mineral salts used by animals to supplement their nutrition, ensuring that they get enough minerals in their diets.

Animal Salt Licks are perfect for Horses, Sheep, Cows, Goat, Camels, Pets, Zoo & Wild animals. These salt licks are superb in stable use for best equine health and sheep cattle farms containing all the nutrients needed by the animal at all life stages.

HOME DÉCOR

Himalayan salt walls have now come to be an imperative part of home décor. Al Amin salt creates easy for you to design your home uniquely. We are here to bring you Himalayan salt tiles or salt bricks in a variation of shapes and designs to make your home interior extremely inspiring. Himalayan salt holds atmosphere-boosting possessions and can eliminate injurious rays from the environment. Salt bricks are being used in many spas, gyms, yoga rooms, and now even in restaurants to generate a soothing surroundings for people. Our Himalayan salt bricks are made up of all-natural and pure Himalayan salt that reliefs to sustain emotional well-being.

HIMALAYAN SALT LAMPS

Al Amin Salt is the largest organization engaged in export oriented manufacturing of Himalayan Salt Lamps. We have an extensive range of salt lamps that includes natural shapes, geometrical shapes, figure shapes, night light lamps, USB lamps & salt chunks.
It's a well-known fact, through scientific and empirical research, salt crystal lamps exhibit biophysical characteristics, which validate a positive effect on our well-being.
More important is its ability to clean the ambient air. Depending upon size and surface area of the salt crystal used for the lamp, the ambient air surrounding it is measurably cleaned by the transformation cycle of hydrogen and oxygen, as well as sodium and chloride ions. This characteristic is especially helpful for relieving the symptoms associated with asthma and allergies in general.
The enjoyable sensation provided by the lamp, along with its visual stimulation, makes it a perfect gift for your love ones!

SALT THERAPY PRODUCTS

The Himalayan Salt Detoxer and the therapeutic salt pillow are known for their magical properties. Himalayan Salt Detoxer is both a pleasing, natural work of art and a powerful tool for re-balancing, revitalizing and gently cleansing the body and mind. Massage balls of salt support circulation and reduce swelling in hands and feet. Himalayan Salt Inhalers are used to improve the symptoms of allergies, respiratory infection, asthma, smokers cough, dry cough and other respiratory ailments. Himalayan salt has many health benefits, and its use is shown to reduced inflammation, kill bacteria, yeast and other micro-organisms that cause sinus and respiratory infections. Our therapeutic salt pillow is filled with 100% natural Himalayan Salt crystals. Salt holds temperature extremely well, whether the temperature is hot or cold. The weight of the salt pillow provides gentle pressure and massage while conforming comfortably to the muscles of face and body's natural curves. Reduce cramps, swelling, inflammation, strains, muscles aches and aliments, get rid of muscular pain and shoulder frozen by this therapeutic salt pillow. Place the pillow, hot or cold, on the painful area you will get relax and heal without any side effects.

BATH AND SPA SALT

Himalayan salt, due to its mineral properties, is used for many purposes, and one of them is the bath salt. Bath salt is known for its amazing properties and for its easy and inexpensive way of solving many problems at once. It can be used 2 to 3 times in a week whether by mixing in warm water or by scrubbing on the body. It makes the bath not even beneficial but also enjoyable that helps in boosting up the energy level. It is a remedy of improving mental and physical health at once by its healing and detoxification properties that results into better sleep, refreshed and calm skin, hydrated skin, and relaxed muscles and joints.

BULK PACKAGING

OEM PACKAGING

Al Amin Salt specializes in all kinds of packaging including various different types of zip lock bags, WPP bulk bags, HDPE shaker bottles or drums, PET grinders or shakers, glass grinders or bottles etc. Our production facility has a completely separate division dedicated to packaging in order to make sure that all requirements of the customer regarding packaging can be catered to. Our packaging department comprises of skilled labor force that have the specific expertise and experience related to packaging techniques. With a help of state of the art infrastructure and the expertise of our team we can tackle all requirements of our customers. The separate division of packaging ensures that we can offer a very wide range of customization option for packaging.

Our diverse range of option in packaging make sure that our customers have the option of choosing the right kind of materials suitable for the business and the market that they are catering to. The option do not come with a very high price tag as our facilities focus on ensuring economies of scale so that the cost incurred on all items are managed appropriately. Hence, outsourcing packaging to us saves or customers a lot more time and money to focus on their core product.

Some of our most common OEM packaging items include bags and printed PE pouches, transparent PE pouches, PET grinders, PET jars, plastic shakers, glass jars, glass ceramic grinders etc.

Our packaging department comprises of skilled labor force that have the specific expertise and experience related to packaging techniques.

READY TO SHELF PRODUCTS

We also offer our own private label brands to resellers around the world to promote as their own brands. For those customers who don't want to work on developing their own customized brand, we offer all our products in private label packaging under different sub brands. Our customers get the option of selling a brand that is already developed in the market at very competitive prices. This also helps buyers that don't want to start with large scale volumes as the MOQs for our private label packaging brands are considerably lower as compared to developing their own customized brand packaging.

OUR CONTINUITY OF SUPPLY

Continuity of supply is our top most priority for our valued customers. We have protected and huge storage system to meet the requirements of customers in any season. We correspondingly try our finest quality of salt to feed the customers at very short notice in the hours of emergency to keep their wheels moving. We devise our own fleets of delivery automobiles to encounter imperative requirements of our customers. With an extensive product range, dedicated fleet of vehicles and highly experienced team, Al Amin Salt is committed to quality ensuring customers receive industry foremost products and outstanding customer service from start to finish. Whether you need salt by the Tons, pallet, truckload, or even ocean containers, both our national and international Shipping Options are convenient and cost effective. We are one of the leading and most reliable sources for high quality Sea, Lake and Rock salts in the Pakistan, supplying huge amount (Capacity) of salt per year to customers spanning the globe.

QUALITY MANAGEMENT

There are no chemicals or synthetic additives consumed in the manufacturing of all edible. Our company has continuously been featuring on quality. Therefore, we have stringent quality controls to indorse that the finest quality shall be delivered to our customers. Appropriate inspections are accompanied during the manufacturing and consumers are updated on regular intermissions on the progress of their orders. All accomplishments are done as prescribed by ISO 9001:2015 and 22000:2005 standards. Grades of salts produced at our facilities, making our food salt products completely natural and organic. These fine and healthy salts are most appropriate for health-conscious consumers and taste great just in their original natural form.

OUR SUPPORT AND SERVICES

Al Amin Salt has well competent staff to sustain our supply chain. This comprising of 300 thousand tons raw salt storage at different locations to keep continue uninterrupted supplies of salt to our valuable consumer, in case of rain or others force major throughout the year. We are the only salt producer in Pakistan who used our own transport fleet to deliver salt from raw source to plants and from plants to our consumers. Our vigilance staff is available 24/7, 365/year for taking orders, delivering product and be responsible for pre and after sales support services. Our sales and service departments are located in almost all industrial areas for any emergency support.
